

CSMN Wi-Fi: Windows 10 BYOD Configuration Advice

The following guide details how to configure Windows 10 'Bring Your Own Device' (BYOD) for connection to the "CSMN" enterprise wireless network.

1. Click on the Wi-Fi icon on the lower-right side of the task bar:

2. Select the 'CSMN' Wi-Fi network. Tick 'Connect Automatically' and click 'Connect':

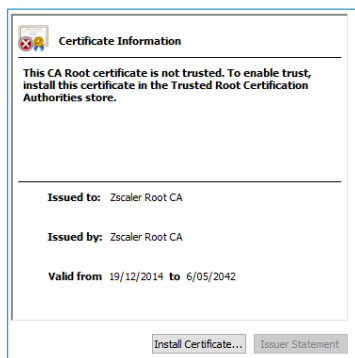

3. Enter your network username/password and click 'Log in':

4. Install the 'zScaler' SSL certificate by typing the following address in Internet Explorer:

<http://mnconnect.cloud/zscaler>

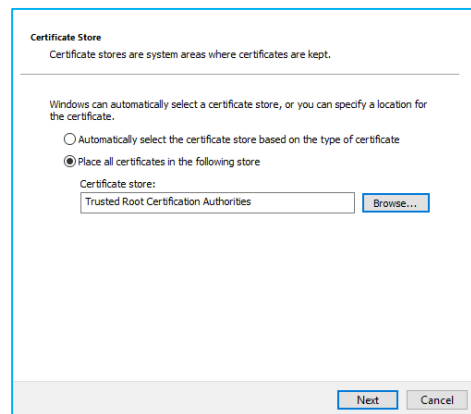

5. Click 'Open' when prompted to open the zScaler certificate file. Click 'Install Certificate':

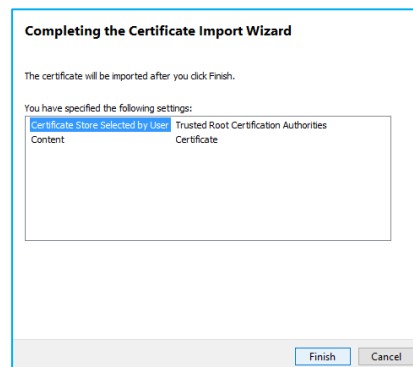

6. Under 'Store location', select 'Local Machine' and click 'Next'. Accept the security warning if prompted.

7. Select 'Place all certificates in the following store' and click 'Browse'. Select 'Trusted Root Certificate Authorities' and click 'OK', 'Next', 'Finish'.

8. Click 'Finish', 'OK':

9. Click 'OK' to close the certificate information window.

You will now be connected to the wireless network and internet access will now be available from the device.

To log out, visit <http://mnconnect.cloud> and click 'Logout'.

*Note: zScaler SSL certificate install (steps 5-9) only need to be done once when initially connecting the device to the CSMN wireless network.
